EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. George Herbster, Applicant's representative, on November 18, 2008.

The application has been amended as follows:

In the claims:

Claims 51, 60 and 76 have been **amended** as follows:

Claim 51. (currently amended). A program ~~stored for storage~~ in a computer readable storage medium for obtaining information about the number of updates to data blocks in data block locations in a data storage facility over a time interval, said program comprising processes for providing:

- A) a definition of a data group set of at least one of the data blocks,
- B) a definition of an interval corresponding to the time period for which update information is desired,
- C) a recording, during the defined interval, of only a first update to each data block location for data in the data group set,

- D) a transfer to the data group set of the information obtained by said recording after the defined interval,
- E) a determination, from the information in the data group set, the total number of data block locations in the data group set that were updated at least one time during the defined interval, and
- F) a conversion of the total number of data block locations changed during the defined interval into bandwidth based information about all the updates ~~transfers involved in updating~~ during the defined interval.

Claim 60 (Currently Amended). A program ~~stored for storage~~ in a computer readable storage medium for determining, from a local site with a local data storage facility, bandwidth related characteristics for a communications path that transfers data, produced by update operations, between first and second remote data storage facilities over a communications path wherein each of the data storage facilities stores data in datasets of defined data blocks, said program comprising processes for providing:

- A) a definition of a set of data blocks in the local site data storage facility,
- B) a definition of defining a time interval,
- C) a recording of an identification of each defined data block in the local data storage facility that is updated during the interval,
- D) a determination, upon completion of the time interval, of the number of data blocks in the defined data blocks that were updated during the time interval, and

E) a conversion of the information based upon the number of data blocks that were changed during the defined time interval into bandwidth related properties of the communications path.

Claim 76 (Currently Amended). A program stored ~~for storage~~ in a computer readable storage medium for determining, from a local site with a local data storage facility, bandwidth related characteristics for a communications path that transfers data, produced by update operations, between first and second remote data storage facilities over a communications path wherein each of the data storage facilities stores data in datasets on defined disk tracks, said program comprising processes for providing:

- A) a definition of a set of disk tracks in the local site data storage facility,
- B) a definition of defining a time interval,
- C) a recording of an identification of each defined disk track in the local data storage facility that is updated during the interval,
- D) a determination, upon completion of the time interval, of the number of tracks in the defined set of disk tracks that were updated during the time interval, and
- E) a conversion of the information based upon the number of disk tracks that were changed during the defined time interval into bandwidth related properties of the communications path.

Allowable Subject Matter

2. Claims 51-91 are allowed. (Renumbered as 1-41)
3. The following is an examiner's statement of reasons for allowance:

The terminal disclaimer filed 8/3/2006 have been approved. The double patenting rejection based upon patent number 6,662,197 has been withdrawn.

The examiner finds applicant's argument concerning Wahl and Ohran references (Applicant's remarks, dated 8/3/2006, pages 15-30) persuasive. Neither Wahl nor Ohran teach the combination of claimed elements as recited in independent claims 51, 60 and 76. Thus, prior art of record neither renders obvious nor anticipates the combination of claimed elements in light of the specification. After a further search and a thorough examination of the present application and in light of the prior art made of record, claims are allowed.

Dependent claims 52-59, 61-75, 77-91 are allowed at least by virtue of their dependency from claims 51, 60, 76.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khanh B. Pham whose telephone number is (571) 272-4116. The examiner can normally be reached on Monday through Friday 7:30am to 4:00pm.
